EDUCATION

University of Waterloo

BCS Candidate, Honours Computer Science Co-op

(Expected) 2023

GPA: 3.7/4.0

Relevant Coursework: Algorithms and Data Structures, Operating Systems, Object-Oriented Programming, Algorithm Design and Data Abstraction, Designing Functional Programs

EXPERIENCE

Royal Bank of Canada

Incoming Full-Stack Developer Intern

Toronto, ON

Jan. 2022 – Apr. 2022

Royal Bank of Canada

Cloud Software Developer Intern (Payments Team)

Toronto, ON

May 2021 – Aug. 2021

- Utilized **Spring Boot** framework to add features and resolve bugs in **Java microservice** for mapping numerous transaction types, used by 3 downstream teams to process over **\$1 million** in e-Transfer transactions daily
- Built a microservice from scratch and shipped it to the cloud to validate transaction records, and generate various types of e-Transfer account statements for **100+** enterprise clients
- Leveraged **Apigee** to deploy a REST API proxy with OAuth 2 and expose microservice to internal API consumers

Imagine Communications

Automation Developer Intern (Playout Team)

Waterloo, ON

May 2020 – Aug. 2020

- Developed **Python** test scripts to automate end-to-end testing of REST APIs to reduce time taken to conduct regression testing by over 80% and to increase product stability
- Created and **automated 150+** tests to increase test coverage of smoke & regression test suite
- Worked in an **Agile development** (Scrum/SAFe) cycle and collaborated with team members on a shared codebase

PROJECTS

Inventory Management System

February 2021

- Created web application with a Python **Flask** back-end and JavaScript, HTML/CSS front-end to add, remove, edit and monitor inventory of athletics clothing
- Deployed application using **AWS Elastic Beanstalk**, and employed **AWS CodePipeline** to implement a simple CI/CD pipeline via GitHub

CourseMatch

January 2021

- Built online platform with **Python** and **React** to connect remote learning students in the same courses
- Used discord.py library and unique tokens created through **Firebase** to verify each student and allowed permissions to channels for only their enrolled courses

Constructors

December 2020

- Developed a C++ terminal game (based on Settlers of Catan) by utilizing OOP principles and MVC design pattern

TECHNICAL SKILLS

Languages & Markup Technologies/Frameworks Developer Tools

Python, Java, C/C++, JavaScript, Bash, HTML/CSS
Spring Boot, Flask, Apache Camel, Thymeleaf, React
Git, Jenkins, JUnit, AWS, PCF, UrbanCode Deploy

EXTRACURRICULAR

Problem Lab Pitch (1st Place)

April 2020

- Team received **\$4000** grant to research an ASL-to-text interpretation device for Deaf and Hard of Hearing individuals
